

Uni-Cast, Inc. selected as Fairchild Controls 2014 Supplier Excellence Award recipient

Suppliers play a vital part in the overall quality of our products, and we view their hard work and dedication as part of the foundation for Fairchild to continue to be a leader in product quality and overall customer satisfaction. It is therefore Fairchild's honor to recognize Uni-Cast, Inc. as recipient of our 2014 Supplier Excellence Award!

For over a decade Uni-Cast has contributed to Fairchild's overall success through consistent collaboration and support in supplying highly-complex aluminum investment castings on several Fairchild programs (NG-PR1, A380, 747-8, and ISR).

Uni-Cast's delivery performance and technical support is top-notch. Over a 4-year period (2011-2014) Uni-Cast attained an overall rating average of 99.1%! This is an excellent accomplishment considering the associated challenge of casting unique and complex geometries such as 3-D contours, thin walls, and undercuts. Uni-Cast has also invested in unique equipment and processes to ensure dimensional accuracy, metallurgical integrity, and superior surface finish.

Uni-Cast is also recognized for complying with Fairchild's unique supplier quality system requirements (e.g., SIDR inspection data, SRA technical discussions).

Uni-Cast's most notable contribution for 2014 was their consistent on-time deliveries of defect-free casting products in support of Fairchild's 747-8 and NG-PR1 programs.

In conclusion, Uni-Cast typifies the type of partner needed to build a truly integrated supply chain, where our suppliers and our internal employees work together to deliver value to Fairchild's customers. We hope you will continue with your excellent service in the coming years!
